

Hatfield-1105: Identify permafrost zone for data analysis

Identify permafrost zone for data analysis

Challenge

Challenge ID:	HCP-1105	Originator:	Onshore: Hatfield
Title:	Identify permafrost zone for data analysis.		
Theme:	ON 1.1: Seismic Planning - Areas of poor coupling		
Consortium Lead:	RPS Group	Interviewed Company:	RPS Group
Geography:	ON.REG.03 - Canada		
Challenge Description			
What is not possible / not adequately addressed at present?			
Information on discontinuous permafrost zone is useful for seismic data processing.			
What effect does this challenge have on operations?			
Need to know the permafrost zone for planning effective survey and processing.			
Thematic information requirements:		Land cover Terrain information	
What do you currently do to address this challenge?			
How is this challenge conventionally addressed?			
Conduct surveys in the winter with frozen ground. Will also look for the best available existing permafrost maps for survey area.			
What kind of solutions do you envisage could address this challenge?			
Up to date and higher fidelity information on permafrost extent.			
What is your view on the capability of technology to meet this need?			
Are you currently using EO tech? If not, why not?			
None			
Challenge Classification			
Impact on Lifecycle (0=none, 4=high):		Climate / Topography / Urgency:	
Pre-license:	2	Climate class:	Severe Mid-Latitude, Polar
Exploration:	3	Topographic class:	Snow/ice
Development:	1	Seasonal variations:	Warmer weather focus
Production:	1	Impact area:	Data Quality
Decommissioning:	1	Technology urgency:	3 - Immediately (0-2 years)
Challenge Information Requirements			
Update frequency:	Snapshot		
Data currently used:	Topographic maps		
Spatial resolution:	Regional, Basin		
Thematic accuracy:	Not specific		
Required formats:	Not Specific		
Timeliness (Vintage):	Reference data		
Geographic extents:	Regional		
Existing standards:	None
