## OTM-008: Determine historical ground movement for infrastructure planning

## Determine historical ground movement for infrastructure planning

## Challenge

	Challenge ID	OTM:008
1	Title	Determine historical ground movement for infrastructure planning
2	Theme ID	ON 3.2: Subsidence monitoring - Infrastructure monitoring
3	Originator of Challenge	Onshore: OTM
4	Challenge Reviewer / initiator	BP, Statoil, PetroSA, Petronas
	General description	Overview of Challenge
5	What is the nature of the challenge? (What is not adequately addressed at present?)	Use of historic ground movement data can influence infrastructure planning, through identification of ground movement trends, etc. It is important to know to what extent and in which direction the is ground moving, before any building /extraction occurs.
6	Thematic information requirements	1. Obtain detailed topographic information, 13. Monitor ground movement,
7	Nature of the challenge - What effect does this challenge have on operations?	Influencing infrastructure planning
8	What do you currently do to address this challenge?/ How is this challenge conventionally addressed?	Optical imagery is used
9	What kind of solution do you envisage could address this challenge?	Historical SAR data acquired over areas where infrastructure is planned can be analysed to produce historical ground movement maps. Areas of subsidence / uplift can be identified and avoid when in the planning phase.
10	What is your view on the capability of technology to meet this need? – are you currently using EO tech? If not, why not?	EO could be a useful complimentary technology
	Challenge classification	
11	Lifecycle stage	Pre license Exp. Dev. Prod. Decom.
11		Pre license Exp. Dev. Prod. Decom. 3 3 0 1
11	Lifecycle stage	r
11	Lifecycle stage	r
	Lifecycle stage Score from impact quantification [1]	3 3 3 0 1
12	Lifecycle stage Score from impact quantification [1] Climate classification	3 3 3 0 1  NOT CLIMATE SPECIFIC
12 13	Lifecycle stage Score from impact quantification [1]  Climate classification Geographic context/restrictions	3 3 3 0 1  NOT CLIMATE SPECIFIC Generic onshore (Unspecified)
12 13 14	Lifecycle stage Score from impact quantification [1]  Climate classification Geographic context/restrictions Topographic classification / Offshore classification	3 3 3 0 1  NOT CLIMATE SPECIFIC Generic onshore (Unspecified) Generic onshore (Unspecified)
12 13 14 15	Lifecycle stage Score from impact quantification [1]  Climate classification Geographic context/restrictions Topographic classification / Offshore classification Seasonal variations Impact Area Technology Urgency	3 3 3 0 1  NOT CLIMATE SPECIFIC Generic onshore (Unspecified) Generic onshore (Unspecified) Any season
12 13 14 15 16	Lifecycle stage Score from impact quantification [1]  Climate classification Geographic context/restrictions Topographic classification / Offshore classification Seasonal variations Impact Area Technology Urgency (How quickly does the user need the solution)	3 3 3 0 1  NOT CLIMATE SPECIFIC Generic onshore (Unspecified) Generic onshore (Unspecified) Any season Infrastructure planning
12 13 14 15 16 17	Lifecycle stage Score from impact quantification [1]  Climate classification Geographic context/restrictions Topographic classification / Offshore classification Seasonal variations Impact Area Technology Urgency (How quickly does the user need the solution) Information requirements	3 3 3 0 1  NOT CLIMATE SPECIFIC Generic onshore (Unspecified) Generic onshore (Unspecified) Any season Infrastructure planning Immediately (0-2 years)
12 13 14 15 16 17	Lifecycle stage Score from impact quantification [1]  Climate classification Geographic context/restrictions Topographic classification / Offshore classification Seasonal variations Impact Area Technology Urgency (How quickly does the user need the solution) Information requirements Update frequency	3 3 3 0 1  NOT CLIMATE SPECIFIC Generic onshore (Unspecified) Generic onshore (Unspecified) Any season Infrastructure planning
12 13 14 15 16 17	Lifecycle stage Score from impact quantification [1]  Climate classification Geographic context/restrictions Topographic classification / Offshore classification Seasonal variations Impact Area Technology Urgency (How quickly does the user need the solution) Information requirements Update frequency Data Currently used	3 3 3 0 1  NOT CLIMATE SPECIFIC Generic onshore (Unspecified) Generic onshore (Unspecified) Any season Infrastructure planning Immediately (0-2 years)
