

# EO services contributing to SDGs

## Urban Heat Vulnerability Map

- User: Municipalities
- Challenge/Needs: Protect citizen from heat stress during summer. Have a holistic approach of the thermal threat over the city and define a heat mitigation strategy roadmap.
- Initiative: Identify through our Urban Heat Vulnerability Map the neighbourhood where the exposure to high temperature is strong, where a high-density of vulnerable people live and with very few vegetation or cooling infrastructure.
- Results:
  - A road map for cooling action at the city-level
  - Initiative of the Cool Street + project
  - 500+ citizens interviewed gave positive feedback regarding the city's initiative
- Service Provider: Ecoten urban comfort

- Target 13.1: Strengthen **resilience and adaptive capacity to climate-related hazards** and natural disasters in all countries
- Target 13.2: Integrate **climate change measures** into national policies, strategies and planning
- Target 13.3: Improve education, **awareness-raising** and human and institutional capacity on climate change mitigation, adaptation, impact reduction and early warning

From spatial data → To local climate action
