

EU Grassland Watch

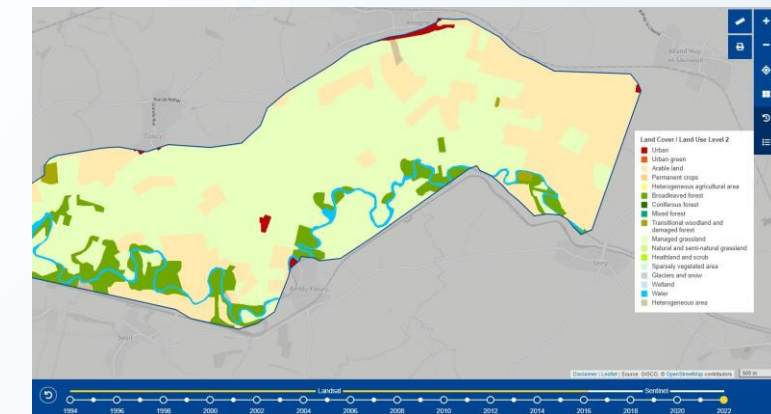

- Users:** Site managers, NGO, regional to European government agencies
- Challenge:** Provide consistent and effective monitoring services for Natura 2000 sites, which consist mainly of grasslands.
- Initiative:** EUGW platform is funded by the European Parliament's Pilot Projects and Preparatory Actions
- Results:** The prototype service has been operational since 2022 with 3,684 Natura 2000 sites mapped annually since 1994. The service provides land cover maps, biophysical properties, management descriptors and indicators. The team are now expanding the number of sites and fine tuning the outputs to suit user needs.
- Service providers:** space4environment, GISAT, Bilbomatica, Specto Natura, Joanneum Research, ILE SAS, VITO, BirdLife Europe and Central Asia, SLU-SSIC & ALSO Space
