

EO services contributing to the Region miBeez 'Precision Apiculture System'

- Users:** Beekeepers, Beekeeping Associations, Research Institutes and Environmental Agencies.
- Challenge:** miBeez integrates a beekeeping management module, a beehive monitoring module using sensor networks and a decision support module that provides advice and warnings to the producer, taking under consideration internal and external environmental conditions.
- Initiative:** miBeez service modules covering all beekeeping activities and responding to emerging beekeepers' challenges and problems.
- Results:** miBeez could be used during all beekeeping activities to help beekeepers manage production, monitor colonies and get advice for optimal decision making, in order to improve quantity and quality of apiculture products, as well as reducing time, cost and efforts.
- Service provider:** Terra Spatium (miBeez, SageAgroBee, Apiary, DIPAS)
