

EO services contributing to SDGs

Reality Check - Infrastructure

spottitt

- User: Infrastructure owners and operators.
- Challenge/Needs: Not all infrastructure has been exposed to the same risks. This service enables infrastructure owners and operators to understand the current and changing risk posed by flooding (corrosion), land motion (line stress) and a whole host of other climate factors to the integrity of their assets.
- Initiative: Developed as part of Spottitt's range of services for utility network operators. Clients able to choose the climate factors most relevant for their geography with data going back 10 years or more.
- Results: Commercially available 'Reality Check' service. Global coverage. Cost £120 per 1,000 square km of territory. Volume discounts available.
- Service Provider: Spottitt Ltd.

Target 9.1 Target 9.1: Develop quality, reliable, sustainable and resilient infrastructure, including regional and trans-border infrastructure, to support economic development and human well-being, with a focus on affordable and equitable access for all.

- infrastructure development, planning and monitoring

Land motion

Soil moisture and flooding frequency
