OTM-013: Flagging environmentally sensitive areas prior to seismic surveys

Flagging environmentally sensitive areas prior to seismic surveys

Challenge

	Challenge ID	OTM:013
l	Title	Flagging environmentally sensitive areas prior to seismic surveys
2	Theme ID	ON 1.3: Seismic Planning - Identification of environmentally sensitive areas
3	Originator of Challenge	Onshore: OTM
4	Challenge Reviewer / initiator	PEMEX, Ramani, PetroSA, Shell, Eni, Exxon, Tullow, Petronas, Chevron
	General description	Overview of Challenge
5	What is the nature of the challenge? (What is not adequately addressed at present?)	Planning the layout of a seismic survey/ seismic lines needs to take into consideration the surrounding environment. Flagging of environmentally significant areas allows for the selection of appropriate seismic lines and methodology e.g. thumpers vs. explosives What is the impact of the seismic line, what damage could be done to the existing environment, what steps can be made to mitigate this, how is it likely to recover. Sometimes we enter governmental protected areas (ie national
		parks) and permits will be needed. To what extent the survey will encroach is important to understand.
6	Thematic information requirements	2. Obtain detailed terrain characterisation, 3. Obtain detailed vegetation information, 10. Fauna and presence and patterns 14. Obtain detailed imagery of the surface,
7	Nature of the challenge - What effect does this challenge have on operations?	Methodology to be adopted needs to be sympathetic to the surrounding environment to avoid breaching environmental legislation / targets. By no meeting these, the operation may reflect poorly on the company and result in licenses not being granted, or b
8	What do you currently do to address this challenge?/ How is this challenge conventionally addressed?	Base maps (which are often inaccurate), together with on-the-ground surveys. If permission is not granted or delayed can be go round the area or shoo another part first.
9	What kind of solution do you envisage could address this challenge?	Better mapping to enable remote identification to be undertaken, and to facilitate environmental impact assessments. Very high to medium resolution EO data to monitor environmentally sensitive.
		Better mapping to enable remote identification to be undertaken, and to facilitate environmental impact assessments. Very high to medium resolution EO data to monitor environmentally sensitive areas.
	this challenge? What is your view on the capability of technology to meet this need? – are you currently using EO tech? If	Better mapping to enable remote identification to be undertaken, and to facilitate environmental impact assessments. Very high to medium resolution EO data to monitor environmentally sensitive areas.
10	this challenge? What is your view on the capability of technology to meet this need? – are you currently using EO tech? If not, why not?	Better mapping to enable remote identification to be undertaken, and to facilitate environmental impact assessments. Very high to medium resolution EO data to monitor environmentally sensitive areas.
10	this challenge? What is your view on the capability of technology to meet this need? – are you currently using EO tech? If not, why not? Challenge classification	Better mapping to enable remote identification to be undertaken, and to facilitate environmental impact assessments. Very high to medium resolution EO data to monitor environmentally sensitive areas.
10	this challenge? What is your view on the capability of technology to meet this need? – are you currently using EO tech? If not, why not? Challenge classification Lifecycle stage	Better mapping to enable remote identification to be undertaken, and to facilitate environmental impact assessments. Very high to medium resolution EO data to monitor environmentally sensitive areas. Pre license Exp. Dev. Prod. Decom.
10	this challenge? What is your view on the capability of technology to meet this need? – are you currently using EO tech? If not, why not? Challenge classification Lifecycle stage	Better mapping to enable remote identification to be undertaken, and to facilitate environmental impact assessments. Very high to medium resolution EO data to monitor environmentally sensitive areas. Pre license Exp. Dev. Prod. Decom.
110	this challenge? What is your view on the capability of technology to meet this need? – are you currently using EO tech? If not, why not? Challenge classification Lifecycle stage Score from impact quantification [1]	Better mapping to enable remote identification to be undertaken, and to facilitate environmental impact assessments. Very high to medium resolution EO data to monitor environmentally sensitive areas. Pre license Exp. Dev. Prod. Decom. 2 4 0 0 0 0
110 111 112 113	this challenge? What is your view on the capability of technology to meet this need? – are you currently using EO tech? If not, why not? Challenge classification Lifecycle stage Score from impact quantification [1] Climate classification	Better mapping to enable remote identification to be undertaken, and to facilitate environmental impact assessments. Very high to medium resolution EO data to monitor environmentally sensitive areas. Pre license Exp. Dev. Prod. Decom. 2 4 0 0 0 0 NOT CLIMATE SPECIFIC
110 111 112 113 114	this challenge? What is your view on the capability of technology to meet this need? – are you currently using EO tech? If not, why not? Challenge classification Lifecycle stage Score from impact quantification [1] Climate classification Geographic context/restrictions	Better mapping to enable remote identification to be undertaken, and to facilitate environmental impact assessments. Very high to medium resolution EO data to monitor environmentally sensitive areas. Pre license Exp. Dev. Prod. Decom. 2 4 0 0 0 0 NOT CLIMATE SPECIFIC Generic onshore (Unspecified)
110 111 112 113 114 115	this challenge? What is your view on the capability of technology to meet this need? – are you currently using EO tech? If not, why not? Challenge classification Lifecycle stage Score from impact quantification [1] Climate classification Geographic context/restrictions Topographic classification / Offshore classification Seasonal variations	Better mapping to enable remote identification to be undertaken, and to facilitate environmental impact assessments. Very high to medium resolution EO data to monitor environmentally sensitive areas. Pre license Exp. Dev. Prod. Decom. 2 4 0 0 0 0 NOT CLIMATE SPECIFIC Generic onshore (Unspecified) Generic onshore (Unspecified) Any season
110 111 112 13 14 15 116	this challenge? What is your view on the capability of technology to meet this need? – are you currently using EO tech? If not, why not?
