

# Cross-SDGs

This is a section in which we present EO services that contribute to achieving more than one Sustainable Development Goals (Cross-SDGs) following EO platforms dedicated to extract customize services on agriculture, forestry, urban planning, water quality, etc.

EO data offer an invaluable opportunity for better-informing development policies and quantifying various targets. How can EO be used to help countries achieve specific targets? *Source: [ESA compendium of EO contributions to the SDG Targets and Indicators](#)*
