- [British small satellite startup Open Cosmos said Friday it secured ESA funding to develop plans for a space weather monitoring constellation.](#)
- Building the Space Talent Pipeline
- BRICS Cooperation: World's major emerging economies agree to build data sharing satellite system
- China launches satellite-based Earth observation initiative with BRICS nations. BRICS to Have 'Virtual Constellation' of EO Satellites. China announced plans to work with several other countries on a Earth science network that appears to counter a U.S.-led initiative. China launched last week the BRICS Joint Committee on Space Cooperation with the goal of cooperation in remote sensing satellite observation and data sharing among China, Russia, India, Brazil and South Africa.
- EU Space Programme is comprised of five components: Copernicus, Galileo, EGNOS, GOVSATCOM and the Space Situational Awareness (SSA) service.
- European parliamentarian seeks to build up ties between US and EU in space
- European Commission allocated €150M from the 2022 EDF work programme to space
- EUPSA is committed to helping the EU, its citizens and its businesses maximise the many social and economic benefits offered by the EU Space Programme. EUSPA is looking to demonstrate the utilisation of Copernicus data and services in the user operational environment via six innovative Proof of Concepts.
- EUMETSAT signs agreement with African Union Commission on climate monitoring
- ESA using GNSS to monitor environmental features
- The European Commission wants to better understand how topics like equality, diversity and inclusion impact the EU's defence, civil aeronautics and space workforce. Anyone working in these sectors is encouraged to take part in a 15-to-20-minute online survey. The deadline for submission is 30 June.

- EUSPA is hiring! Current vacancies include Ground System Service Provision Engineer, Galileo System Evolution Manager, Operator at the Galileo Security Monitoring Centre (GSMC) and Secured Communications Engineer.
- Interested in a traineeship? Watch our short video on the EUSPA traineeship experience and learn more about the current openings.
- Internships at Planet
- PhD on advancing remote sensing analysis through the use of machine learning at Syracuse University, US
- Postdoc on urban data and modeling science at ETH Zurich, Switzerland
- Postdoc on Spatial analysis of the carbon cycle of the dry tropics at University of Edinburgh, UK
- Postdoc on remote sensing of vegetable oil crops in Central Africa at Liverpool John Moores University, UK
- Expert for Copernicus land monitoring services at the European Environment Agency, Denmark
- Geospatial Data Scientists in the Domain of Crop Monitoring at GAF AG, Germany
- Data Engineer for Development of Satellite Data based Machine Learning / Deep Learning Applications at GAF AG, Germany
- Domain Manager Earth Observation Institutional at OHB, Germany
- Senior Program Officer for Digital Agronomy at Bill & Melinda Gates Foundation, US
