

eoSCAN (August 2023)

Corporate News  Thanks to contributions from @Terrawatch Space

- Aerospacelab: CEO of the new North American branch + Group Chief Strategy + Revenue Officer named
- Carbon rating firm BeZero Carbon is partnering with French EO analytics company Kayros to map the Amazon basin using satellite imagery and geospatial data to rate carbon projects
- Carbon monitoring startup Sylvera, which uses remote sensing data among other sources, has raised \$57M in Series B funding
- Capella Space announced details about its next-generation SAR satellite including high-resolution imagery and low latency delivery
- Constellis raises €17m in Seed Funding
- Development Seed announced the launch of eoAPI, a cloud-native, open geospatial data infrastructure to make archived EO data more easily discoverable and interoperable
- Luxembourg-based startup Kleos Space has filed for bankruptcy
- Indian startup GalaxEye has announced plans to launch the world's first multi-sensor satellite in 2024
- NuView Aims To Map Earth In 3D Using Satellite Based LiDAR
- Planet Completes Acquisition of Sinergise; Set to Expand Planet's Earth Data Platform
- Privateer Space, a space sustainability startup founded by Apple co-founder Steve Wozniak, unveiled an EO marketplace that will be powered by an edge compute, storage, machine learning, and data transmission module
- SatSure is partnering with Rabo Partnerships, an initiative of the Dutch agribusiness bank, Rabobank, to enable cash flow-based lending for smallholder farmers globally using SatSure's EO products;
- Satellogic and Quant Data & Analytics Announce 3-Year Agreement
- SatSure invests in Astrogate Labs
- Spire Global teams up with OroraTech to launch a fleet of wildfire-monitoring satellites. Spire Global awarded a GHGSat contract for satellite constellation expansion. [SEE FULL STORY](#). Spire rolled out a new weather monitoring and alerting platform, called DeepVision aimed at the energy, supply chain and logistics industries
- Umbra, which announced its open data policy earlier in the year, said it has now released over \$1M worth of free data;
- Australia's space industry is facing an uncertain future after the recent budget cuts which cancelled the national EO programme
- AI-Empowered Policy Making with the UN Arab Region Data and Policy Support Hub
- China Launches New Meteorological Satellite. China launched the FENGYUN-3F weather satellite
- China successfully launches new satellite for Earth observation
- EU's Copernicus program: Tracking humans' impact on Earth
- India's first Defence UAV Testing Centre to be in Tamil Nadu. Indian Startup to launch world's first Multi-Sensor Satellite in 2024
- India's IN-SPACe considering a public-private partnership for building and operating a national EO constellation. India launched 7 Singaporean satellites, including a SAR satellite to be used by Singapore government agencies and commercial customers
- Indian EO analytics firm, SatSure, which is building a constellation of satellites, made a strategic investment in Astrogate Labs, a startup building laser communications system that enhances downlink speed to 1 Gbps
- IN-SPACe moots PPP model for earth observation satellite constellation for India
- ISRO published details of the NISAR Utilization Programme, an initiative to allow Indian researchers to access data from the NISAR satellite with a dual-frequency S-and L-band SAR instrument, launching in early 2024
- 5 Private Companies Planning Earth Observation Missions
- NASA announced the release of the first open-source geospatial AI foundation model for EO data, built using the Harmonized Landsat Sentinel-2 dataset, in partnership with IBM
- NOAA Eliminates Certain Restrictions on Commercial Remote Sensing Companies. NOAA lifts many commercial remote sensing license conditions
- Radiant Earth, PLACE, Spatial Collective, and the Kenyan Space Agency are collaborating on a pilot project to collect and curate labelled high-resolution agricultural data for open access and public benefit in Kenya
- The UK Space Agency announced £15M in funding which will be used to invest in a range of environmental monitoring EO instruments
- The Government of Western Australia invested AUD 800,000 in LatConnect 60, which is building a constellation of EO satellites
- The Group on Earth Observations announced the development of Global Heat Resilience Service that aims to provide every urban area in the world with intelligence on the health risks from exposure to extreme heat using EO
- SkyWatch announces availability of Umbra SAR data and also launches InSARance
- UK Space Agency funds Earth observation technologies. UK Space Agency announces £15M for Earth Observation technologies
- What if Latin America Built a Shared Satellite Data Center?

The Strategic Roadmap developed under the FIREFORUM project reflects the research and innovation strategy, with the EC and Member State funding agencies in mind as the prime audience. Download the pdf version of the road map for the following sectors

- NASA scraps study to use lidar space sensors for climate monitoring of aerosols
- Satellites Detect Methane Leak in Kazakhstan Raising Climate Concerns
- Scientific Innovation and an Evolving Industry Landscape
- SAR satellites from Capella Space are falling back to Earth much sooner than the three years they were anticipated to operate, due to a combination of issues with the propulsion system and increased solar activity
- Planet Joins BARSC. Planet has announced a layoff of 117 employees, about 10% of its ~1,000 employees
- Planet Labs and MAXAR images provide updates of Maui fires' devastation
-
- European space traffic management company Neuraspace has joined NVIDIA Inception, a program that nurtures startups revolutionizing industries with artificial intelligence
- EnduroSat Partners with Vyoma for SSA Mission
- IN-SPACe may be looking at 130 satellites
- Hesai Technology, NVIDIA Collaborate on AV System Development
- Pioneering worldwide space partnerships to boost UK innovation
- PrivacyHawk Raises \$2.7 Million to Pioneer the Personal Data Protection Market
- Real-estate broker Redfin will include wind risk data provided by the non-profit firm First Street Foundation, based on current and projected wind exposure from hurricanes, for nearly every U.S. property listed on its website
- SatSure Invests in Astrogate Labs for Laser Communication Solutions
- The Next Frontier in Agriculture: Earth Observation Drones for Precision Farming
- Tilebox, an Austrian startup, building a platform for space data management raised \$1.7M in pre-seed funding;
- Top Five Applications of Remote Sensing
- Quantum Space Exec Details Plan to Open Access to GEO
- 10 small projects to save the planet using environmental satellite data

- Google, together with Woodwell Climate Research Center, has won a \$5M grant to create satellite-based analysis methods for permafrost monitoring in the Arctic, leveraging data from public and commercial sources
- Luxembourg-based radio frequency monitoring startup Kleos Space has filed for bankruptcy, due to launch delays, satellite development issues, and challenges with accessing capital
- Iceye Awarded 1st NASA Task Order Under Satellite Imagery Acquisition Contract
- Hyperspectral satellite startup Pixxel won a grant from the Ministry of Defence to manufacture miniaturized multi-payload (optical, SAR, infrared, hyperspectral) satellites for the Indian Air Force
- Space-related security and defence projects funded through the EDF
- Spire Global Extends Contract with NASA for Earth Observation Data
- Spire won a €16M contract from ESA to demonstrate a civil aviation tracking constellation that would not rely on any global navigation satellite system
- The US Space Force will receive \$40 million for a pilot program to evaluate the use of commercial imaging satellites in support of military operations
- The US Environmental Protection Agency and the Department of Energy will provide more than \$1B in funding to reduce methane emissions from the oil and gas sector, which includes tools to monitor methane emissions
