OTM-026: Identifying potential hydrocarbon seepage

Identifying potential hydrocarbon seepage

Challenge

	Challenge ID	OTM:026
1	Title	Identifying potential hydrocarbon seepage
2	Theme ID	ON 2.3: Surface Geology Mapping - Lithological discrimination
3	Originator of Challenge	Onshore: OTM
4	Challenge Reviewer / initiator	Exxon, Chevron
	General description	Overview of Challenge
5	What is the nature of the challenge? (What is not adequately addressed at present?)	Identifying hydrocarbon seepages or anomalies in characteristics such as in mineralogy and vegetation may indicate that the presence of a reservoir
6	Thematic information requirements	11. Determine lithology, mineralogy and structural properties of the near surface, 14. Obtain detailed imagery of the surface,
7	Nature of the challenge - What effect does this challenge have on operations?	Being able to identify potential hydrocarbon leaks would allow us to more efficiently target these areas for exploratory work, which inevitably (you would hope) would increase our exploration success.
8	What do you currently do to address this challenge?/ How is this challenge conventionally addressed?	On the ground observation, influenced from geological surveys.
9	What kind of solution do you envisage could address this challenge?	
10	What is your view on the capability of technology to meet this need? – are you currently using EO tech? If	
	not, why not?	
11	Challenge classification Lifecycle stage	Pre license Exp. Dev. Prod. Decom.
11	Score from impact quantification [1]	Pre license Exp. Dev. Prod. Decom. 4 3 1 0 0
	Score from impact quantification [1]	4 3 1 0 0
12	Climate classification	NOT CLIMATE SPECIFIC
13	Geographic context/restrictions	Generic onshore (Unspecified)
14	Topographic classification / Offshore classification	Generic onshore (Unspecified)
15	Seasonal variations	Any season
16	Impact Area	Environmental
17	Technology Urgency	Immediately (0-2 years)
	(How quickly does the user need the solution)	
	Information requirements	
18	Update frequency	
19	Data Currently used	
20	Spatial resolution	
21	Thematic accuracy	
22	Example formats	
23	Timeliness	Within a month
24	Geographic Extent	regional interest
25	Existing standards	

[1] Impact quantification scores: 4 – Critical/ enabling; 3 – Significant/ competitive advantage; 2 – Important but non-essential; 1 – Nice to have; 0 – No impact, need satisfied with existing technology
