OTM-040: Security of pipelines

Security of pipelines

Challenge

	Challenge ID	OTM:040
1	Title	Security of pipelines
2	Theme ID	ON 5.4: Logistics planning and operations - Monitoring of assets
3	Originator of Challenge	Onshore: OTM
4	Challenge Reviewer / initiator	PEMEX (North Mexico), Shell, Sasol, Exxon, Petronas
	General description	Overview of Challenge
5	What is the nature of the challenge? (What is not adequately addressed at present?)	Technology to enhance companies' ability to limit oil theft through the tapping of pipelines is needed.
6	Thematic information requirements	9. Obtain detailed imagery of assets,
7	Nature of the challenge - What effect does this challenge have on operations?	Loss of HC, potential environmental damage, safety hazard following tampering of infrastructure
8	What do you currently do to address this challenge?/ How is this challenge conventionally addressed?	Ground patrols can be deployed as a deterrent but these are costly and not full-proof.
9	What kind of solution do you envisage could address this challenge?	Very high to high resolution EO data with high repeat cycles can be used to map changes in land use, such as pipelines. Tapping of pipeline has to be visibly detectable
10	What is your view on the capability of technology to meet this need? – are you currently using EO tech? If not, why not?	
	Challenge classification	
11	Lifecycle stage	Pre license Exp. Dev. Prod. Decom.
	Score from impact quantification [1]	0 0 1 4 0
12	Climate classification	NOT CLIMATE SPECIFIC
13	Geographic context/restrictions	Generic onshore (Unspecified)
14	Topographic classification / Offshore classification	Generic onshore (Unspecified)
15	Seasonal variations	Any season
16	Impact Area	Operational cost reduction, health and safety
17	Technology Urgency	Immediately (0-2 years)
	(How quickly does the user need the solution)	
	Information requirements	
18	Update frequency	depending on sensor and application
19	Data Currently used	
20	Spatial resolution	
21	Thematic accuracy	80-90%
22	Example formats	Standardized geo-spatial formats (e.g. shapefile, geotiff or KML)
23	Timeliness	within a day
24	Geographic Extent	district area
25	Existing standards	

[1] Impact quantification scores: 4 - Critical/enabling; 3 - Significant/competitive advantage; 2 - Important but non-essential; 1 - Nice to have; 0 - No impact, need satisfied with existing technology
