Hatfield-5101: Obtaining baseline land use for pipeline route planning

Obtaining baseline land use for pipeline route planning

Challenge

Title: Obtaining baseline land use for pipeline route planning. Theme: ON 5.1: Logistics planning and operations - Baseline mapping of terrain and infrastructure Consortium Lead: Interviewed Company: Arup Geography: ON.REG.00 - Generic onshore Challenge Description What is not possible / not adequately addressed at present?	Challenge ID:	HCP-5101		Originator:	Onshore:	Hatfield		
Theme: ON 5.1: Logistics planning and operations - Baseline mapping of terrain and infrastructure Consortium Lead: Interviewed Company: Arup Geography: ON.REG.00 - Generic onshore Challenge Description	Title:	Obtaining baseline land use for pipeline route planning.						
Lead: Arup Company: Arup Geography: ON.REG.00 - Generic onshore Challenge Description	Theme:							
Geography: ON.REG.00 - Generic onshore Challenge Description	Consortium	Arun		Interviewed				
Challenge Description	Lead:	Arup		Company:				
What is not possible / not adequately addressed at present?								
Need detailed baseline land cover and land use maps to support pipeline route planning - extensive linear								
corridors have specific data requirements. What effect does this challenge have on operations?								
Reduce planning costs by determining optimal or most favourable pipeline route alignment based on land use								
constraint analysis.								
Thematic information Land use								
requirements: Land cover	requirements:	Land cover	over					
What do you currently do to address this challenge?								
How is this challenge conventionally addressed?								
Aerial surveys and satellite imagery.								
What kind of solutions do you envisage could address this challenge?								
High resolution optical images								
What is your view on the capability of technology to meet this need?								
Are you currently using EO tech? If not, why not?								
Mature technology with lots of choice of sensors	Mature technolog							
Challenge Classification								
Impact on Lifecycle (0—none								
4=high): Climate / Topography / Urgency:	•	·	Climate / Topography / Urgency:					
Pre-license: 1 Climate class: Generic climate	Pre-license:		1	Climate class:		Generic climate		
Exploration: 2 Topographic class: Not specific	Exploration:		2	Topographic c	lass:	Not specific		
Development: 4 Seasonal variations: Any season	Development:		4	Seasonal variations:		Any season		
Production: 1 Impact area: Environmental	Production:		1	Impact area:		Environmental		
Decommissioning: 2 Technology urgency: 3 - Immediately (0-2 years)	Decommissionin	Decommissioning: 2		Technology urgency:		3 - Immediately (0-2 years)		
Challenge Information Requirements								
Update frequency: Snapshot	Update frequence	ey:	Snapshot					
Data currently used: Landsat, ASTER, GoogleEarth, RapidEye, aerial photography	Data currently u	sed: I	*					
Spatial resolution: Regional	· ·							
Thematic accuracy: Not specific	_							
Required formats: Not specific								
Timeliness (Vintage): Within six months
