## Assisting urban planning activities

Earth Observation Support to Urban Development

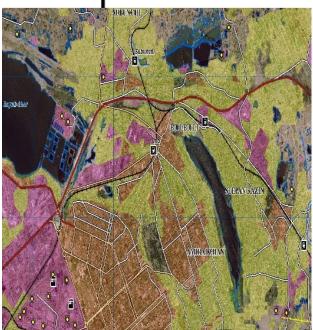

Fig. Baku regional development graphic

- ·Users: World Bank
- ·Need: Assist urban planning activities
- •Challenge: Provision of up-to-date EO based land monitoring products focused on various aspects of urbanized areas
- •Initiative: Identification of infrastructure, settlements including classification into urban density classes, hydrology or environmental threats at different levels of detail.
- •Results:Investment done will return in practical consequences of the fact that planning activities in Greater Baku area in following years could be based on accurate and up-to-date information
- •Service provider: Gisat (www.gisat.cz/content/en)
- •More info: www.respond-int.org
