

Best Practices

The ESA **Earth Observation Best Practice for Oil & Gas Industry** (EO4OG) provides comprehensive insights into the geo-information requirements of the oil & gas sector and how EO services and products can help meet those needs. The work has been carried out by C-CORE, CLS, Hatfield Consultants and OTM. [Find out more here.](#)

The ESA **Earth Observation Best Practice for Agro-Insurance** (EO4I) is a knowledge platform on the current geo-information requirements and needs of the agro-insurance sector. The platform highlights how exactly Earth observation services can provide state-of-the-art solutions and meet the challenges of agricultural insurance industry. The work has been conducted by a consortium of European Earth Observation companies including GeoVille, VITO and CGI. [Find out more here.](#)
