

eoSCAN (January 2018)

Market Watch "at glance"

January 2018

Market

- Astrosat and DroneSAR form partnership to enhance Search and Rescue capabilities
- EARS and AGI sign MoU
- Earth-i launches prototype of world's first full-color video satellite constellation
- ICEYE Successfully Launches World's First SAR Microsatellite and Establishes Finland's First Commercial Satellite Operations
- Maxar Has Found a New Group President for MDA
- MDA Selected to Study Alternatives to Protect Canadian Space Assets
- Second SuperView satellite pair launched from China
- SIIS and UrtheCast Sign Agreement for Global Distribution of their Respective Portfolios
- UrtheCast Close to Securing Funding for EO Constellation
- 2018 Could Be a Revolutionary Year for Smallsats
- EMEA (Europe, Middle East and Africa) Airborne Hyperspectral Imaging System Market Overview
- Global Hyperspectral Remote Sensing Market, application, specification analysis, technology
- Global Nano Satellite & Micro Satellite Market Estimated To Reach \$ 6,111.8 Million by 2026 - Polaris Market Research
- In-Orbit Servicing Market Opportunity Exceeds \$3 Billion
- Hyperspectral Remote Sensing Market 2017-2022 Top Manufacturers by Key Players
- New Study Focusing on Satellite Remote Sensing Market Forecast 2017-2022- Challenges
- Remote Sensing Satellite Market Perceive Accrued Value with 5% of CAGR | Market In-Depth
- Report Recommends Priorities for Earth Observations from Space
- Satellogic Creates Geo-Analytical Group and Plans a Double SmallSat Launch
- Satellites to be Built & Launch, Small Sats, Satellite-Based Earth Observation
- Satellite-based earth observation market forecast from 2018 to 2023
- Satellite Value Chain: The Snapshot 2017
- Small-Satellite Value Chain Assessment
- Small Satellite Markets, 4th Edition
- The Satellite Value Chain 2017 Snapshot Published by Euroconsult
- Trends In Satellite-based Earth Observation Market: Size, Production, Prospects, Consumption
- e-geos awarded Frontext contract
- Boost needed for space-based Earth observation, say US academics
- Boulder scientist helps shape vision for next decade of Earth observations
- Canadian Nanosatellite Launches from China
- China launches remote sensing satellites SuperView-1. China's ambitions in space are growing
- Copernicus DIAS is biggest ESA contract for Poland to date
- China-Brazil Satellite Scheduled for Launch in 2019
- EMEA (Europe, Middle East and Africa) Hyperspectral Remote Sensing Market
- ESA and SatCen formalize cooperation with Administrative Arrangement
- Europe's space agency braces for Brexit fallout
- EU urged to continue investment to strengthen position in space
- Europe explores new opportunities in space
- Hyperspectral Camera To Fly On ESA's Next CubeSat
- Japan Successfully Launches New Earth Observation Satellite
- JAXA Successfully Launches Two Earth Observation Satellites. Japan launches 'super low altitude' satellite
- India to launch its 100th satellite on Friday
- Indian Government Plans to Start Commercial Mapping and Navigation Platform
- Israel to Launch World's First Nanosatellites in 2018
- Morocco satellite launch could accelerate Spanish space efforts
- NASA Report: Top Science Priorities for Space-Based Earth Observation Over Next Decade
- NASA plans purchase of Earth science data from private companies
- National Academies plan for next decade of atmospheric chemistry observation
- NSR Keeping an Eye on Meaningful SmallSat Mergers and Acquisitions
