

eoSCAN (September 2018)

Market Watch "at glance"

September 2018

Market

- 3DEO space tech firm to create 33 jobs. Belfast-based space technology firm 3DEO NI announces major recruitment drive
- Airbus announces finalists of Multi-Data Challenge within Copernicus Masters 2018
- Airbus and Orbital Insight partner on The OneAtlas Platform to build world-class geospatial analytics. Airbus Defence and Space's Plan with Orbital Insight to Build a Suite of Geospatial Analytics Services and Tools
- Airbus to help grow Australia's space industry capability
- Artificial Intelligence Has Great Strength in the Interpretation of Geodata
- Australian space agency signs statement with Airbus
- BAE Systems to Provide Actionable GEOINT Capability for the National Geospatial-Intelligence Agency's Janus Portfolio
- Bankers see a growing industry shift to smallsats
- Capella Space closes \$19M Series B to deliver reliable Earth observation data on demand
- DigitalGlobe and LeoLabs working to promote safe, responsible spaceflight
- Descartes Labs Forms Imagery Partnership with Airbus
- Maxar Technologies' DigitalGlobe Selected to Create a Geospatial Cloud Analytics Hub for DARPA
- MDA to Deliver SAR Information for Mission-Critical Support
- New business success for e-GEOS in Indonesia and Japan
- Orbital Insight Extends Imagery Sourcing Contract with Planet / Planet and Orbital Insight Expand Satellite Imagery Partnership.
- Orbital Insight Acquires FeatureX
- Radiant Earth Foundation to Release Earth Imagery Platform. Radiant Earth Foundation Releases First Earth Imagery Platform for Global Development
- Rezatec completes follow-on investment led by Harbert European Growth Capital to underpin continued global expansion
- UK radar satellite NovaSAR-1 successfully launched
- Brokers Issue Forecasts for UrtheCast Corp's Q3 2018 Earnings (UR)
- Earth Observation Satellite Market | Size | Analysis | Share | Outlook to 2025. Global Nano and Micro Satellite Market Growing Demand 2018 to 2025
- Earth Observation Market to grow at a CAGR of 12.52% during 2018-2022
- European geospatial industry is being stimulated by a fourth industrial revolution and is expected to touch €93.94 Billion by 2020.
- Global Off-grid Remote Sensing Power Systems Market Insights, Forecast to 2025
- Global Europe Satellite-based Earth Observation Market Demand, Scope, Research Methodology
- Global Remote Sensing UAV Market Insights, Forecast to 2025
- Global Earth Observation Market 2018 – PlanetiQ, Planet Labs, Satellogic, Deimos Imaging, EGEO...
- Know the Key Areas For Investments In Earth Observation Satellite Market
- Off-grid Remote Sensing Power System Market 2018-2023
- Remote Sensing Services - Global Market Outlook (2017-2026)
- Remote Sensing UAV Market Key vendor analysis, Geographical segmentation, size and forecast
- Satellite-based Earth Observation Services Market Analysis and In-Depth Research on Market
- Bluesky and Getmapping Win UK Gov Contract. Blue Sky Networks Acquires Applied Satellite Engineering
- Capella Space closes \$19M Series B to deliver reliable Earth observation data on demand
- Contract Awards in the Millions for Kratos Defense & Security Solutions to Build Earth Stations
- DigitalGlobe Receives Contract Renewal from NSA
- European Space Imaging Awarded €20 Million Maritime Contract
- ESA chooses Thales Alenia Space to support data processing from Sentinel 2A and 2B Earth observation satellites
- GMV's Largest Contract of 250 Million Euro Also the Biggest Contract Ever Awarded by Spain's Space Industry
- Maxar Technologies' DigitalGlobe Awarded Global EGD Contract Renewal by U.S. Government to Provide On-demand Access to Mission-ready Satellite Imagery
- National Geospatial-Intelligence Agency Awards Seven Geospatial Analytics Contracts
- Potential \$600 Million for DigitalGlobe's Contract with National Reconnaissance Office
- Winning bids to drive millions of investment into Midlands

- Achieving Sustainable Development Goals through Space Science and Technologies
- Australia's New South Wales Sends New Space Startups To AusTrade Landing Pad In United States. Australia's new Space Industry Roadmap reveals space exploration plans
- Arianespace to launch KOMPSAT-7 for South Korea's space agency
- Belgique coopère avec la France pour CSO
- Brazil-China Satellite to Track Deforestation Slated for 2019
- China Launches New Satellite to Forecast and Monitor Marine Disasters
- Chinese institute's virtual ground stations serve 10 countries
- CSIRO directs space agency away from humans and towards commercialisation
- Egypt's EgyptSat-A Reconnaissance Satellite Set To Be Launched From Russia In November 2018
- Italy's e-GEOS To Supply COSMO-SkyMed Imagery To Indonesia And Japan
- ISRO seeks partner to make small launchers. ISRO's First Overseas Ground Station to Come up at North Pol.
- ISRO Sends UK-Built SAR Imaging Satellite to Orbit
- Kazakhstan And Uzbekistan SATCOM Cooperation And Central Asian Earth Observation Satellite
- Myanmar Mulling Space Agency; Earth Observation Small Satellite With Japanese Assistance
- Morocco's Mohammed VI-B Earth Observation Satellite Due To Be Launched By Arianespace. Morocco to launch 2nd Earth observation satellite in Nov. Morocco to Foster Earth Observation Capabilities with Second Satellite
- New Satellite Tech Partnership in Chile for Agri Data
- Overview of Global Remote Sensing Satellite Market insights
- STEREO in action
- Taiwan seeks collaboration with India in outer space
- Thai military orders Earth observation cubesat from Innovative Solutions in Space
- The Australian Space Agency and the Centre National d'Etudes Spatiales announce partnership
- Ukraine restarts the space program
- UK warns of satellite and space program problems in case of Brexit 'no deal'
- UK radar satellite NovaSAR-1 successfully launched
- US National Geospatial-Intelligence Agency Awards Seven Geospatial Analytics Contracts

- [A new fleet of satellites is detecting human rights abuses from space](#)
- [Agriculture a key beneficiary of EU Space Programmes.](#)
- [agriculture is one of the main sectors to benefit from synergies between the flagship EU Space Programmes EGNOS, Galileo and Copernicus.](#)
- [with European-GNSS and Earth Observation technologies being leveraged to implement the Common Agricultural Policy.](#)
- [Artificial Intelligence in Transportation Market by Segmentation, Analysis and Opportunity](#)
- [Big Aerospace Goes Big on Smallsats](#)
- [China aspires to become major space power with series of launches](#)
- [CSIRO directs space agency away from humans and towards commercialisation . CSIRO launches new space industry roadmap.](#)
- [DigitalGlobe Receives DARPA Contract for Geospatial Cloud Analytics](#)
- [Earth Observation Micro-Satellite to be sent](#)
- [Earth observation provides business intelligence for smart farming](#)
- [EUMETSAT Meteorological Satellite Conference. Satellite conference, please click here.](#)

- [Skylogic Research Releases Third Annual Drone Industry Benchmark Survey Results](#)
- [Space sector to benefit from multi-million pound work on UK alternative to Galileo](#)
- [SpaceChain CEO Brings Blockchain to the NewSpace Industry](#)
- [Space, Galileo Bringing Robust Solutions to European Farmers](#)
- [Taiwan seeks collaboration with ISRO](#)

- Abidjan, Côte d'Ivoire – Making best use of satellite data for sustainable development will be discussed by attendees of this week's EUMETSAT User Forum in Africa.
- Above Hurricane Florence
- Achieving Sustainable Development Goals through Space Science and Technologies
- Aeolus satellite exceeding all expectations with its first data on wind – a truly remarkable feat so early in its life in space.
- ANA Holdings and JAXA partner to create a new space industry centered around real-world avatars
- British Association of Remote Sensing Companies Celebrates SSTL as Their New Corporate Member
- Children for the Oceans and CMEMS hand in hand to protect our oceans
- Copernicus Research and User Support (RUS) celebrates its first anniversary
- Degradation of Wetlands Contributes to Social Instability and Insecurity
- Earth Observation Micro-Satellite to be sent
- ECOSTRESS maps LA's hot spots
- ESA Space Solutions Belgium
- ESA's Role in Easing Water Scarcity
- Euroconsult's Annual Awards for Excellence Announced ... Selected by Industry Experts
- High tech system promotes wildlife around Devon and Cornwall roads
- How scientists are tracking Florida's red tides with satellites and smartphones
- ICESat-2 Adds Third Dimension to Earth. ICESat-2 to measure movement, thickness of polar sea ice
- Leonardo Illuminates the European Researchers' Night with Educational Workshops
- MDA to Deliver SAR Information for Mission-Critical Support
- Modern System Used by the Firefighters. Satellites and Drones Helpful in Flood Prevention
- More ships and more clouds mean cooling in the Arctic
- NASA Space Imaging Helps Predict Crop Yields
- New Satellite Map Shows Ground Deformation During Indonesian Quake
- Nigerian Space Agency releases Preliminary investigation on Abuja Earthquake
- The new C3S website is live

- Ocean satellite Sentinel-6A beginning to take shape
- Pakistan Maps Crops Using Sentinel Satellite
- PlanetWatchers Launches Foresights Analytics Platform to Advance Commercial Forestry. PlanetWatchers Unveils Multi-Source SAR Analytics Platform
- Researchers look overseas for radar images of floods
- Satellites safeguard Europe's potato industry
- Satellites Reveal Underground Lifestyle of Wombats
- Scientists baffled after satellite spots fleet of abandoned ships in middle of DESERT
- Small Satellites are at the Center of a Space Industry Transformation
