

# Service Providers

**eoPAGES** is a marketplace between the European Earth Observation Service Industry & Users. **eoPAGES** shows the capabilities of the geo-information industry in general and value-adding companies in particular. The objective is to help potential customers explore the available value-added geo-information services of interest to them in a new and user-friendly way. Find out more [here](#).

eoMALL is a platform for the European Earth observation services sector that lets you discover online, **web-based value-added EO services**. **eoMALL** is developed by the European Association of Remote Sensing Companies (EARSC) with the support of the European Space Agency (ESA) to promote European companies delivering online-based services. Find out more [here](#).

EARSC, the European Association of Remote Sensing Companies, is a trade association based in Brussels and has more than 120 member companies from more than 23 countries. Members provide a range of services covering the whole spectrum of Earth observation applications and products. Find out more [here](#).
