

EO in Action

This area provides a consolidated list of success stories contained within the EO Wiki. To find success stories linked to particular products or applications, go to the appropriate product page where the relevant success stories are listed. To view the success stories, go through the gallery below, or use the [FILTERED LIST](#) to search for specific use cases.

Use the search tab to discover success stories related to the following projects:

- e-shape
- NextGEOSS
- SeBS

Land

		
Environmental impact of road construction	Assessing geese damage in the Netherlands	Surviving in remote regions
		
Monitoring oil reservoirs	Surface geological mapping: Gulf of Suez, Egypt	Ecosystem Valuation And Change: Terminal, Shetland Islands
		
Soft ground mapping: Western UAE	Surface deformation monitoring with InSAR	Regional oil-sand watershed

Remote sensing based crop monitoring for Early Warning

Forest monitoring

Proactive Pipeline Maintenance with Network Alert

HSRG-EO based surveillance of mercury pollution (Minamata Convention)

Golf course monitoring in Italy

Global oil industry activity monitoring

DMCii supports the fight with illegal logging in Amazon

Forest cover mapping in Cambodia

Mapping and monitoring forest cover

Large scale forest destruction- REDD

TerraSAR-X support to deforestation in Borneo

TerraSAR-X 3D mapping geological Indonesia

Monitoring service for railways

Shale development - Using imagery and DEMs to improve operation efficiency

Image support for land tenure m

Lidar data processing

Infrastructure and development planning

GIO water and wetlands

 agrowth alpha version Agrowth: A satellite based crop monitoring platform	 IKD Identification of synergetic SDGs using heterogeneous data and deep learning models	 NATURA Valorising long-term observati
 eVineyard European Earth Observations Leading Global Vineyard Innovation		

Built Environment

 Optimal design of solar farms	 GHAWAR OILFIELD 5308 km² SHEDGUM 497.1 km² Oil performance study: Ghawar oilfield	 Pipeline encroachment monitoring
--	--	---

Improving waste management practices

Assisting urban planning activities

Environmental impact of road construction

Thermcert: Thermal & carbon efficiency reporting tool

Pipeline infrastructure in the Netherlands

A solar nowcasting, forecasting system and atlas to guide energy management and planning in Egypt

Marine & Maritime

Impact of dredging operations

Operational Risk in Ice-Prone Waters

Assess impact of marine oil spills

Sea turbidity monitoring

Ship monitoring

Protecting sensitive coastal environments

Current vein location

River plume localisation

Ocean model validation: operational validation

Oil spill disaster in the Gulf of Mexico

Measuring surface wind

Sea surface slicks

Dredging in the Maldives

Peatland management in the UK

EOs adding value to historical water availability & quality information services

Oil seep and seismic correlation study for the Adriatic Sea

Tidal level and currents

GIO water and wetlands

Satellite based oceanography

Water quality monitoring

EO data services for management of coastal zone

Warning of ice melts

Offshore winds and resources

How satellite Earth Observation can help with monitoring for the Water Framework Directive

Atmosphere & Climate

Successful Integration of EO-Based Observations and
Machine Learning in Spring Peak Flow Forecasting

System for monitoring law enforcement of informal mining.

Harvester Season

MUNI | RECETOX

Global tool for effective POPs monitoring

Future climate projection of heat indices for Austrian major cities

Seasonal and decadal climate predictions for German state capitals

Sub-seasonal and seasonal forecasts for winter maintenance activities in cities

CRITERION Service

Sub-seasonal to seasonal predictions for tyre companies

Disasters & Geohazards

Monitoring flood waters

Mapping damage from earthquakes

Using mobile crowdsourcing for flood warnings

Seismic planr

Seismic planning and flood assessment in Peru

CGI-Live land

Assessing natural hazards and climate change risks

Mou

A live map of

A complete meteo-hydrological chain to support early warning systems from weather scenarios to flooded areas: the Apollo medicane use case

Integration of EO and model data for the monitoring of volcanic plumes critical to aviation: the Mt Etna case of 12 March 2021

Security & Safety

Ship location

CGI-Live land

CGI: E-surge

Satellite based vessels detection

EYWA- Early Warning System for Mosquito Borne Diseases
